## Dental transformation from Dr Ó Droma

These days, everybody wants the Hollywood megawatt smile and fortunately, there is a lot that ordinary mortals can do to make the most of their smiles.

6190814, email [lodroma@orthocosmetics](mailto:lodroma@orthocosmetics.ie) or log on to [www.orthocosmetics.ie](http://www.orthocosmetics.ie).

Some technical help from a specialised cosmetic and orthopaedic dental practitioner can bring about a big transformation and Dr Liam Ó Droma, located at the new dental surgery in the Medical Centre in Spiddal, offers a full range of cosmetic and orthocosmetic dental services. These include cleaning, teeth whitening, implants, veneers, crowns and **orthodontics**. In high demand at the moment is a combination of alignment and whitening. Using the latest Damon technology, Dr Ó Droma can rapidly align teeth and with tooth coloured brackets and tooth coloured arch wires, visual impact is minimised.

Other options include a sequential series of clear invisible aligners made from fine plastic that is very subtle. This system, known as the invisalign, usually takes about six months to beautifully align crowded anterior teeth. Another speciality is the fitting of the finest porcelain veneers, which offer immediate solutions to alignment and colour problems. In addition, the latest Zirconium crowns offer the patient a real advantage as very little of the original tooth need to be removed. As strong as steel, it looks incredibly natural.

All prices are extremely competitive, even by Northern Ireland standards and without affecting guaranteed quality work.

The clinic has an unbeatable offer of full laser whitening, using the latest non UV laser Polus machine, for just €95. An amazing quick smile transformation can also be achieved as Dr Ó Droma's work, as seen here, using life lasting porcelain veneers from €470 per veneer.
